

MAY USE FLOW OF DREDGER TO BUILD UP PIER

Plan Suggested Whereby Concrete Retaining Wall Would Save Soil for Filling

With a possibility that the construction of a new wharf at the so-called Channel site may be done in conjunction with the harbor dredging operations by the Standard American Dredging Company along Quarantine Wharf, thus saving a considerable sum of money to the territory, work of putting a concrete retaining wall about the area may be begun soon.

At least this is one proposition that has come up for the harbor board to consider, depending of course upon the agreement that may be reached with the dredging firm. According to the contract which exists between the company and the United States Engineers' Office the territory has first say as to whether it wishes to use the soil and coral raised in the dredging operations.

Nearness of the dredger to the proposed pier will make it feasible, it is said, to turn the flow in the area provided a retaining wall be built in time, the work of cutting and filling being thus accomplished in a single operation.

As told in the second edition of yesterday's Star-Bulletin, the harbor board yesterday afternoon received word from Governor Pinkham that the president had turned back practically four and a half acres of land along the Channel wharf site for the use of the territory, and the board voted immediately upon receipt of the letter to call for a tentative sketch of a 225-foot pier.

Governor Pinkham is given considerable credit for his work in conjunction with the board to get the land set aside to the territory. The governor has worked on the subject since early in the summer.

PALAMA GIRLS WILL HAVE HOME FOR THEMSELVES

Palama Settlement girls are to have a home all of their own. It will not be very large or pretentious or particularly well fitted with those little things which the young girl enjoys, but it will be theirs and theirs only and that is what counts with them.

The new place is the structure formerly used as a pavilion for all the children. Now it is to be boarded up and fitted with chairs and tables for a regular club house.

Miss Florence Lowe, the new girls' work director, expects to have at least one gas stove for cooking and will attempt domestic science for the older girls but only to a limited extent.

Heretofore all the girls' clubs have met in the gymnasium, having no regular home of their own. Now they will conduct most of their games, dances and meetings in the pavilion.

Prior to the meetings in the gymnasium the Palama girls met in the cottage now occupied by Assistant Head Worker and Mrs. W. R. Humphries.

The Kaimuki Improvement Club will hold an important meeting this evening at 7:30 o'clock in the assembly hall of the Littlehale school. A large number of subjects important to residents of that district are to come up for discussion.

'SLOP BEER' CASE IS HEARD BEFORE COMMISSIONERS

Several interested business and professional men attended the liquor license board meeting Wednesday afternoon when James E. Thompson, proprietor of the Imperial Bar, was heard on a charge of selling "slop" beer. Other charges were also preferred against him. Considerable testimony was offered to prove the charge, by former employees of Thompson. The hearing was postponed to this afternoon.

Other matters included a reprimand to the Fashion saloon for selling liquor to drunken men, and a report by Inspector Fennell on the disturbance Saturday night at Heine's Tavern in which the inspector cleared the hostility of any blame.

This afternoon Fennell reports that the Frost saloon will be cited for selling "slop" beer.

RULES REGARDING HOME OF QUEEN EMMA PASSED BY HAWAII DAUGHTERS

Rules and regulations bearing on Hanaakamalama, the Nuuanu home of the late Queen Emma, were adopted at a meeting on Wednesday of the Daughters of Hawaii, which society now has charge of the home. The rules are as follows:

"1. The object of Hanaakamalama is to preserve articles formerly owned by the late Queen Emma and such other articles of historic interest as may be given the Daughters of Hawaii for safe keeping.

"2. The building shall be open to visitors daily from 9 to 12 in the morning and from 2 to 4 in the afternoon, excepting Sunday and other days that may be designated.

"3. The house can only be used as a meeting place for the Daughters of Hawaii and cannot be engaged for any other purpose.

"4. A fee of 25 cents will be charged all visitors, members excepted.

"5. Visitors are requested not to handle or deface any article in the building."

HARBOR BOARD TAKES UP KALAUPAPA WHARF QUESTION WITH PRATT

Whether or not improvements are needed at the Kalaupapa wharf, Molokai, is a question that has been put up to Dr. J. S. B. Pratt, president of the board of health, by the harbor board.

Dr. Pratt said today that while he has certain ideas in regard to such work at the Molokai port, he will leave the writing of a recommendation until he has had a talk with Superintendent John D. McVeigh of the leper settlement. McVeigh will be down to Honolulu at the end of this week.

An appropriation of \$10,000 was set aside for a wharf at Kalaupapa at the last session of the legislature and just what the measure through has always been a question. The recommendation was not made by the board of health or by the harbor commission. There is already a concrete wharf at the place, and it is not thought that \$10,000 would go very far toward building a new one. On the other hand there may be minor changes and repairs to be made.

HIGHLANDER MILK

Rich Milk thoroughly Purified

That in a sentence sums up Highlander Condensed Milk (full cream). There are very definite and real reasons for its superiority.

First of all the milk is the world's finest. New Zealand's dairy conditions and legislation are the world's model—its dairy products top the world for the price because of their quality. Highlander Condensed Milk is prepared from the purest and richest milk of the specially selected herds in the rich dairying pastures of Southland. The cows are subject to Government inspection, and the milk is drawn from each cow under exceptionally rigorous conditions of cleanliness.

It is then immediately filtered and cooled at the dairies. Next it goes to the great model Highlanders—cleanliness personified.

Here it is again filtered and subjected to a process which destroys all disease germs. Part of the water is removed by evaporation in vacuo, and a proportion of the finest No. 1A sugar is added.

Highlander Condensed Milk is full cream—the richest, purest milk, less part of the water. More economical than fresh milk—there is no water—use what is wanted, the remainder is available for further use.

Hygienic, uniform, handy, always ready, it is cheaper, more reliable. For cooking it is far superior to ordinary milk—try it.

There are hundreds of recipes in the big 200-page beautifully illustrated Highlander Cook Book. Write for a FREE copy to-day.—address "Highlander," Dept. "A" Fred L. Waldron, Ltd., Agents Honolulu.
